

Capital University of Science & Technology

Term Project Proposal

Department of Electrical and Computer Engineering

Project Title		Quiz Application with Performance Feedback
Course Title		Applications of Information and Communication Technologies lab
Sr. No.	Student Name	Registration Number
01.	Fatima Amjad	BCPE 243001

Idea:

The Quiz Application with Performance Feedback will be a console-based C++ program. It allows users to answer questions, calculates their score, and provides detailed feedback based on their performance. The application can include multiple-choice, true/false, or short-answer questions.

Objectives:

The **objective** of the "Quiz Application with Performance Feedback" program is to provide an engaging and interactive platform for users to test their knowledge while learning from their performance. The program is designed to serve the following purposes:

Primary Objectives:

1. Knowledge Assessment:

- Test the user's understanding of a specific topic or subject through a set of questions.

2. Performance Evaluation:

- Calculate the user's score based on correct and incorrect answers.
- Provide meaningful feedback to highlight strengths and areas for improvement.

3. Interactive Learning:

- Encourage learning in a fun and interactive manner by allowing users to revisit questions and improve.

4. Data Handling Practice:

- Demonstrate how questions and user data can be stored, retrieved, and managed in a program.

Applications:

1. Student Assessments:

Used by schools and colleges to evaluate students' knowledge on specific subjects.

2. E-Learning Platforms:

Integrated into online learning platforms to assess users after lessons.

3. Mock Tests:

Practice quizzes for competitive exams or subject-based tests.

4. Employee Skill Assessment:

Evaluate employees' knowledge during training or onboarding programs.

5. Certification Programs:

Test knowledge and issue certifications based on performance.

Block Diagram:

Start

Display a welcome message.

Initialize Variables

score = 0

answer (to store user input).

Question 1

Display question and options.

Get user input (answer).

If answer == correct_option:

Increment score.

Display "Correct!".

Else:

Display “Wrong!” and the correct answer.

Question 2

Display question and options.

Get user input (answer).

If answer == correct_option:

Increment score.

Display “Correct!”.

Else:

Display “Wrong!” and the correct answer.

Question 3

Display question and options.

Get user input (answer).

If answer == correct_option:

Increment score.

Display “Correct!”.

Else:

Display “Wrong!” and the correct answer.

Calculate Total Score

Display the total score (score).

Provide Feedback

If score == 3:

Display “Excellent!”

Else if score == 2:

Display “Good job!”

Else if score == 1:

Display “Keep practicing!”.

Else:

Display “Better luck next time!”.

End.

Instructor Remarks

Student 1 Signature: _____

A handwritten signature in black ink, appearing to be 'C. M.' with a stylized flourish at the end.

Instructor's Signature: _____

Date: 10th january , 2025
